

Covert Earpiece®

The Covert Earpiece® allows you discrete communication without the risk of overexposure and eventual hearing loss.

The Covert Earpiece® is a product different from all others we manufacture. Not used as a hearing protection device, but rather as a communication receiver. It allows the wearer to receive your radio messages even in noisy environments. It has a built in volume limiter which prevents the wearer from the risk of hearing damage from high volume radio signals.

RECOMMENDED USES

- Police
- Security
- Movie Sets
- Hospitality
- Fire and Rescue

The use of this hearing protector is not limited to the above applications.

FEATURES

- Discrete
- Hypoallergenic
- Patented Volume limiter
- Available in clear
- Universal fit

BENEFITS

- Reduce risk of hearing loss from radio transmission
- Does not block the wearer from external noise
- The clear colour makes it inconspicuous
- Allows wearer to feel secure due to design
- Extremely comfortable to wear
